to me		

Hi Miya,

The second project is similar and it is against Salt Lake City Housing Authority, Real Property Management and Jefferson School Apartments.

We will make sure that all the tenants are aware of your site and will have single click access to the individual via direct phone, email, or on the page itself.

We will also set up GoFundMe along with its management and I do understand your first priority is James for now.

The names which I mentioned above as references goal for them was to promote the pages through social media and Influencers marketing creating websites for them was not part of the package hope this clarifies.

My understanding for both the projects is clear now let's initiate the first one once we get to feel the success of the first project then we can Initiate the second one as well.

Just waiting for the confirmation from your side to proceed with James project once you approve it then immediately we will start working on the website design along with Social Media Page creation with SEO strategy which includes keyword research which we will be optimizing to bring the site on first page Of google in the local as well as city state and nationwide searches.

We will also do complete prior research before initiating a GoFundMe campaign to make sure we reach the right audience to maximize our donations.

Waiting for your approval to get started feel free to ask if you have any further questions thanks.

Steve Marshall.

Associate Manager.
