 Quotation # 1106-22R
 Quotation Terms 15 Days

Bill To:

Steve Cook
 11300 Clinton Rd
 Clinton, MI

Prepared by: Matt Getzen

End of June

Proposed Work:

Sidewalk/Patio Replacement

Removal/disposal of existing concrete and paver blocks where new sidewalks and patio will be installed as laid out by homeowner. Prep approx 463sqft for concrete installation. Bring in crushed concrete base as needed. Grade area to a 4" depth for new concrete installation. Compact areas for a firm base. Installation of new concrete with 6 bag, 4,000psi mud with fiber mesh reinforcement for added strength and longevity. Install #4 rebar to prevent the concrete from shifting during their freeze and thaw season. Concrete to be edged and broomed finish. Return next day to remove forms, saw cut and clean.

Drain Tile

Trench for and install 4" drain tile from the two existing down spouts on the west side of the home. Trench approx 100 feet Southwest to where the drain tile will be daylighted. This should be completed at the same time as the sidewalk and patio work is completed.

Front Porch/Steps

Removal/disposal of existing concrete porch and steps. Prep approx 120sqft for concrete porch with 3 steps measuring 6 feet wide with 18" treads. Bring in crushed concrete base as needed. Grade area to a 4" depth for new concrete installation. Compact areas for a firm base. Installation of new concrete with 6 bag, 4,000psi mud with fiber mesh reinforcement for added strength and longevity. Install #4 rebar to prevent the concrete from shifting during their freeze and thaw season. Concrete to be edged and broomed finish. Return next day to saw cut and clean.
