Subject: Re: [Plunge Support] Re: Call with Kasim Aslam To: Plunge Support <support@thecoldplunge.com>

Hi Kevin,

I just got the order confirmation. It's for the chiller and inkbird. I don't think it's the inkbird that's broken, it's the power strip.

Can you confirm that's included in what's being sent?

On Tue, Nov 21, 2023 at 5:26 PM Plunge Support <support@thecoldplunge.com> wrote:

Yes the warranty covers parts and repairs. I can send your ticket over to my managers if you would like better assistance with your issues as I'm just a troubleshooter. Would you like me to order your chiller replacement or would you like to speak with someone first?

On November 22, 2023 at 12:17:16 AM UTC, kasim@sol8.com wrote:

I bought the plunge last year so I'm obviously out of the 30 day window. However, it's been breaking down every other month since I got it. Y'all marketed it with a full year warranty. Where is that now? I think I got an extended warranty too because I bought during last Friday.

Why doesn't the annual warranty cover this?

Honest opinion: if you had an \$8k appliance that broke down every 45 days how would you want the company to respond?

On Tue, Nov 21, 2023 at 4:51 PM Plunge Support <support@thecoldplunge.com> wrote:

I can send you out a chiller replacement, We offer a 30-day return policy if you are dissatisfied for any reason. To initiate a return and receive a refund, please ensure the following steps are followed:

- Contact **customer service** so they can coordinate with Omni Logistics to pick up the Plunge.
- Drain your plunge. **CLICK HERE** for directions.
- Take pictures of the unit in the event something happens in transit.

Please note: The customer will be responsible for covering the shipping costs for the return along with a 15% restocking fee.

For any further assistance or inquiries regarding the return process, don't hesitate to reach out to our support team. We are here to help!

On November 21, 2023 at 10:57:18 PM UTC, kasim@sol8.com wrote:

The chiller just flipped the breaker. It's on a dedicated 20 amp circuit.

I'm assuming that means calibration isn't the issue.

With all due respect:

I've been super patient. This is beyond the "troubleshooting" phase.

Either I've got a lemon or y'all's products are horrible.

I'm eager to assume the former.

Can you please send me a new Plunge that doesn't break down every 60 days?

Or honor your warranty and refund my money?

Kasim

On Tue, Nov 21, 2023 at 3:36 PM Plunge Support <support@thecoldplunge.com> wrote:

Ok I think the calibration only does 5 degrees so when calibrating the chiller select the lowest temperature and see where that brings you.

On November 21, 2023 at 10:31:21 PM UTC, kasim@sol8.com wrote:

Looks like it's already spot on. See attached.

On Tue, Nov 21, 2023 at 1:28 PM Plunge Support <support@thecoldplunge.com> wrote:

If you have an external thermometer we can calibrate the chiller to get as close as you can to the actual water temp.

On November 21, 2023 at 8:17:18 PM UTC, kasim@sol8.com wrote:

Currently at 46 and cooling

On Tue, Nov 21, 2023 at 12:17 PM Plunge Support <support@thecoldplunge.com> wrote:

Ok this could be more of an issue with the chiller other then the Inkbird and I will need to know what the present temperature is on the water chiller since you have it plugged into a separate outlet. There are no notes on what the present temperature is for the chiller.

On November 21, 2023 at 7:05:21 PM UTC, kasim@sol8.com wrote:

The chiller is set to 39. Again, because it wasn't on the temp was higher but is now dropping.

Yes, jets are flowing. Filter is working, etc. It's just the chiller.

It's the same exact thing that's happened the other 7 times.

If you'll please go back and review my previous tickets you'll find a litany of supporting documentation including photos and videos.

On Tue, Nov 21, 2023 at 11:55 AM Plunge Support <support@thecoldplunge.com> wrote:

Ok what is the present and set temperature on the water chiller? Do you have water flowing from the jets?

On November 21, 2023 at 6:47:34 PM UTC, kasim@sol8.com wrote:

The set value is 42 degrees F

Present value started at 78 or so this AM and has been dropping since I plugged the chiller into a separate outlet.

On Tue, Nov 21, 2023 at 11:24 AM Plunge Support <support@thecoldplunge.com> wrote:

Hi Kasim, this is Kevin with plunge support. Can you tell me what the present and set value is on the Inkbird?

On November 21, 2023 at 5:59:24 PM UTC, kasim@sol8.com wrote:

Hi Kathleen,

Photos attached.

The plunge powers on fine. The chiller does not when plugged into the plunge power strip. It powers on fine if I plug it in separately.

Thanks,

Kasim

On Tue, Nov 21, 2023 at 10:52 AM Plunge Support <support@thecoldplunge.com> wrote:

Hi Kasim,

My name is Kathleen with the plunge Triage.

We apologize if you are encountering issues with your Plunge. Let's find out what's going on so we can get you plunging again. We are gonna need a photo of the component side of your plunge, the inside of your electrical box, and a close up of the power strip inside your electrical box.

Help us understand a little more about what you are experiencing by responding with the corresponding number.

- 1. My plunge has no power.
- 2. My power keeps shutting off. HELP!

As soon as we have these photos and have a better idea of what's going on, we'll be able to plunge into finding a solution.

On 2023 M11 21 17:17:21 UTC, kasim@sol8.com wrote:

Hello Plunge People -

My plunge is broken again. The chiller doesn't power on when plugged into the Plunge power strip. It works when I plug it into the wall directly.

This will be the 7th (seventh) time someone has come out to fix my plunge. I'm sure you'll agree that we've gone past the point of absurdity.

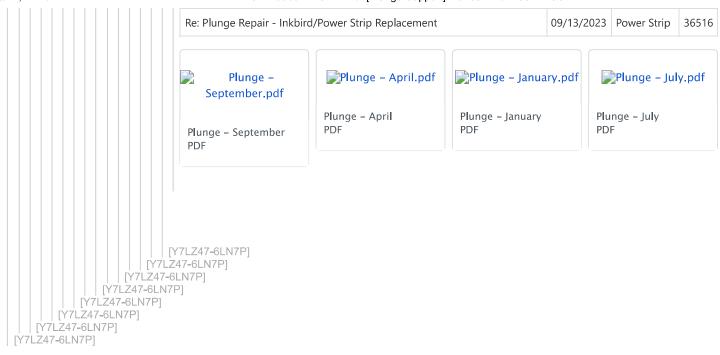

Please do not send another power strip or inkbird. That's obviously not the root of the issue.

I would appreciate a more permanent solutions and remedy.

Thank you,

Kasim

Hello, I hope this email finds you well. I bought a cold plunge a year ago and it just broke again. I dropped a previous ticket showing how it's broken I think 9 times in 12 months.

I'm not interested in yet another fix. I obviously have a lemon and would either like a replacement or refund please. You'll find in this email the last ticket issued, but there are many more over the course of the last 12 months. I'll attach the order number and date of the purchase.

I'll kindly await for your answer, thanks!

It's the same issue I've had every single time. I'm fatigued at having this conversation the same way every time and no longer interested in the fool's errand of trying to help you understand why your product is flawed. Especially given that this problem started literally right away and has persisted ever since. Here you will find a timeline of all the times it was broken down, without including the November ticket

Thanks

Hello.

I'm really sorry to hear that you're experiencing another power issue. I understand how frustrating it must be to deal with recurring problems like this. Let's work together to identify the root cause and find a lasting solution. This doesn't seem to be a common issue, and replacing the entire unit might not be the best approach at this time. Given that your unit is no longer under the factory warranty, and considering the terms of your extended warranty, our focus will be on diagnosing and repairing the problem. If we find that a repair isn't feasible, we can then explore the option of a replacement.

To help us get to the bottom of this, I'll need a few photos:

- The back component side of your plunge, showing all components.
- The front of the chiller, with a view of the installation and spacing.
- · The inside of the plunge's power box.
- · The outlet into which the plunge is plugged.

These photos are crucial for us to provide the necessary support and prevent this issue from recurring.

I also noticed that you have a hot and cold model in Arizona. This setup is typically intended for freezing climates and might not be ideal for your environment, which could be contributing to the issues. If you're open to it, I recommend removing the heater unit. We can refund the \$600 extra you paid for the heater. This change might help in preventing further complications.

All the best,

Barry

My unit no longer being under warranty is irrelevant given that this is a known and recurring issue for as long as I've had the unit.

You have had ten opportunities to "find a lasting solution".

I'm done wasting my time.

Please send a full refund immediately.

Or:

I'm filing a complaint with the Better Business Bureau I'm filing a complaint with the attorney general's office I'm filing a case in small claims court

Thanks

I understand this situation can be frustrating, and we really want to work with you to find a solution. There could be various reasons for the issue you're experiencing, and it's possible it might be related to your electricity. Let's collaborate to investigate all potential causes. We're committed to resolving this together, although issuing a refund isn't something we can offer at this time. Your patience and cooperation mean a lot to us, and we're here to support you every step of the way.

All the best,

Barry

Thanks! I follow the maintenance guide religiously but didn't know what to do to cut through grime. Knowing I can use soap is super helpful. Is regular dish soap okay or do you recommend anything specific?

On Sun, Oct 22, 2023 at 8:05 AM Plunge Support <support@thecoldplunge.com> wrote:

Hello Kasim.

Cristian here with Plunge support. Cleaning the waterline in your plunge is a straightforward process, and you can easily do it with a regular sponge. Here's a simple guide to help you maintain a clean waterline:

- 1. **Materials Needed:** You'll require a regular sponge and some warm, soapy water. Ensure the sponge is clean and free from any abrasive particles.
- 2. **Gently Wipe:** Gently wipe along the waterline area of the plunge. Use soft, circular motions to remove any buildup or discoloration.

Please see the water maintenance guide in this link: https://cdn.shopify.com/s/files/1/0409/5626/4605/files/PRINT Residential Water-Maintenance-2023.pdf?v=1689264860

Note: If your water gets murky or dirty, always drain and refill. Please be aware that besides offering these guidelines, Plunge customer support is not available to troubleshoot water quality.

Thank you for choosing the Plunge!

All the best, Cristian

Hello,

This is Tatum with the PLUNGE repairs team.

I see the Inkbird needs to be replaced. The factory warranty will cover the cost of a repair tech to do the service. We are more than happy to find one for you.

We have found that most customers are able to take care of this repair on their own. This route typically gets the Plunge up quicker. We are here to assist during the repair if needed.

Check out the video below to see if it is something you might be able to do. If not, not a problem we will find and schedule that tech for you.

Hi Kathleen,

Photos attached.

The plunge powers on fine. The chiller does not when plugged into the plunge power strip. It powers on fine if I plug it in separately.

Thanks,

Kasim

On Tue, Nov 21, 2023 at 10:52 AM Plunge Support <support@thecoldplunge.com> wrote:

Hi Kasim,

My name is Kathleen with the plunge Triage.

We apologize if you are encountering issues with your Plunge. Let's find out what's going on so we can get you plunging again. We are gonna need a photo of the component side of your plunge, the inside of your electrical box, and a close up of the power strip inside your electrical box.

Help us understand a little more about what you are experiencing by responding with the corresponding number.

- 1. My plunge has no power.
- 2. My power keeps shutting off. HELP!

As soon as we have these photos and have a better idea of what's going on, we'll be able to plunge into finding a solution.

On 2023 M11 21 17:17:21 UTC, kasim@sol8.com wrote:

Hello Plunge People -

My plunge is broken again. The chiller doesn't power on when plugged into the Plunge power strip. It works when I plug it into the wall directly.

This will be the 7th (seventh) time someone has come out to fix my plunge. I'm sure you'll agree that we've gone past the point of absurdity.

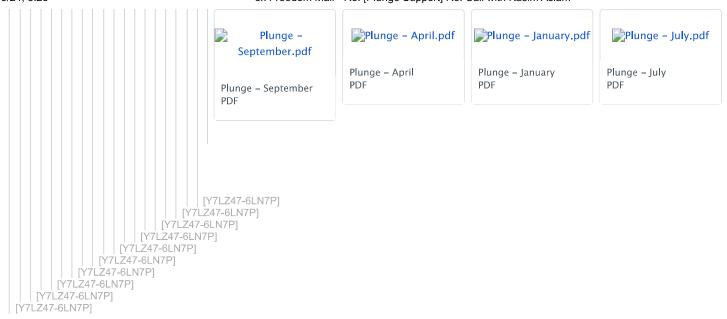

Please do not send another power strip or inkbird. That's obviously not the root of the issue.

I would appreciate a more permanent solutions and remedy.

Thank you,

Kasim

Hey Kasim, Brian here with Plunge,

I won't be able to get a tech out there until sometime next week. Just curious what makes you uncomfortable with doing that? if I could hop on a phone call with you and help walk you through the installation if you need it so we could get this handled much sooner. The replacement is so simple and would be hard to mess up.

Thanks, and be well,

Brian Shannon | Repair Specialist | The Cold Plunge (916) 426-8123 | 1721 Aviation Blvd. Suite 100, Lincoln CA, 95648

- 1. I have the hot/cold XL model
- 2. I tried this and it didn't work. Already sent you a video.
- 3. SV is currently at 41. It lowers the chiller on, cools perfectly fine, but then trips the power breaker.

On Mon, Apr 10, 2023 at 12:34 PM Service Residential <service-residential@thecoldplunge.com> wrote: | Kasim,

We're gonna make sure everything is set up the right way and you understand how this all works.

- 1. Standard Model only! Check green power switch on right side of chiller
- 2. Make sure that the chiller is pugged into the "cooling" outlet inside the electrical box.
 - If the chiller is plugged into the power strip and not "cooling" the heater and chiller will fight each other and the water will not cool, or heat, the way it is intended.
- 3. Check your Inkbird temperature settings.
 - The Set Value (bottom number) must be at least 4 degrees lower than the Present Value (top temperature) for the chiller to power on.

Subject: Re: [Plunge Support] Re: Call with Kasim Aslam To: Plunge Support <support@thecoldplunge.com>

Hi Kevin,

I just got the order confirmation. It's for the chiller and inkbird. I don't think it's the inkbird that's broken, it's the power strip.

Can you confirm that's included in what's being sent?

On Tue, Nov 21, 2023 at 5:26 PM Plunge Support <support@thecoldplunge.com> wrote:

Yes the warranty covers parts and repairs. I can send your ticket over to my managers if you would like better assistance with your issues as I'm just a troubleshooter. Would you like me to order your chiller replacement or would you like to speak with someone first?

On November 22, 2023 at 12:17:16 AM UTC, kasim@sol8.com wrote:

I bought the plunge last year so I'm obviously out of the 30 day window. However, it's been breaking down every other month since I got it. Y'all marketed it with a full year warranty. Where is that now? I think I got an extended warranty too because I bought during last Friday.

Why doesn't the annual warranty cover this?

Honest opinion: if you had an \$8k appliance that broke down every 45 days how would you want the company to respond?

On Tue, Nov 21, 2023 at 4:51 PM Plunge Support <support@thecoldplunge.com> wrote:

I can send you out a chiller replacement, We offer a 30-day return policy if you are dissatisfied for any reason. To initiate a return and receive a refund, please ensure the following steps are followed:

- Contact **customer service** so they can coordinate with Omni Logistics to pick up the Plunge.
- Drain your plunge. **CLICK HERE** for directions.
- Take pictures of the unit in the event something happens in transit.

Please note: The customer will be responsible for covering the shipping costs for the return along with a 15% restocking fee.

For any further assistance or inquiries regarding the return process, don't hesitate to reach out to our support team. We are here to help!

On November 21, 2023 at 10:57:18 PM UTC, kasim@sol8.com wrote:

The chiller just flipped the breaker. It's on a dedicated 20 amp circuit.

I'm assuming that means calibration isn't the issue.

With all due respect:

I've been super patient. This is beyond the "troubleshooting" phase.

Either I've got a lemon or y'all's products are horrible.

I'm eager to assume the former.

Can you please send me a new Plunge that doesn't break down every 60 days?

Or honor your warranty and refund my money?

Kasim

On Tue, Nov 21, 2023 at 3:36 PM Plunge Support <support@thecoldplunge.com> wrote:

Ok I think the calibration only does 5 degrees so when calibrating the chiller select the lowest temperature and see where that brings you.

On November 21, 2023 at 10:31:21 PM UTC, kasim@sol8.com wrote:

Looks like it's already spot on. See attached.

Hello, I hope this email finds you well. I bought a cold plunge a year ago and it just broke again. I dropped a previous ticket showing how it's broken I think 9 times in 12 months.

I'm not interested in yet another fix. I obviously have a lemon and would either like a replacement or refund please. You'll find in this email the last ticket issued, but there are many more over the course of the last 12 months. I'll attach the order number and date of the purchase.

I'll kindly await for your answer, thanks!

Hi Josefina,

Thank you for contacting PLUNGE Customer Success!

Check out our Help Center to find the answer to your question, or solve the issue you are facing on your own.

We have received your email, please allow one business day for us to review your information and get back to you.

Sincerely, PLUNGE Customer Success

Kasim,

This is Josh from Plunge

I see the last time you reported an issue with your unit was last November. Please correct me if I'm wrong. What seems to be the issue this time?

It's the same issue I've had every single time. I'm fatigued at having this conversation the same way every time and no longer interested in the fool's errand of trying to help you understand why your product is flawed. Especially given that this problem started literally right away and has persisted ever since. Here you will find a timeline of all the times it was broken down, without including the November ticket

Thanks

Hi, the plunge is now off entirely. There's no power at all. The breaker box is fine. It's been checked out by a professional electrician.

Thanks

Hi, I have made a document showing all the times the plunge has broken and needed a tech, without counting the last two. Also attached you'll find the email threads. Now as I said, it's off entirely. Thanks!

Hello.

I'm really sorry to hear that you're experiencing another power issue. I understand how frustrating it must be to deal with recurring problems like this. Let's work together to identify the root cause and find a lasting solution. This doesn't seem to be a common issue, and replacing the entire unit might not be the best approach at this time. Given that your unit is no longer under the factory warranty, and considering the terms of your extended warranty, our focus will be on diagnosing and repairing the problem. If we find that a repair isn't feasible, we can then explore the option of a replacement.

To help us get to the bottom of this, I'll need a few photos:

- The back component side of your plunge, showing all components.
- The front of the chiller, with a view of the installation and spacing.
- · The inside of the plunge's power box.
- · The outlet into which the plunge is plugged.

These photos are crucial for us to provide the necessary support and prevent this issue from recurring.

I also noticed that you have a hot and cold model in Arizona. This setup is typically intended for freezing climates and might not be ideal for your environment, which could be contributing to the issues. If you're open to it, I recommend removing the heater unit. We can refund the \$600 extra you paid for the heater. This change might help in preventing further complications.

All the best,

Barry

My unit no longer being under warranty is irrelevant given that this is a known and recurring issue for as long as I've had the unit.

You have had ten opportunities to "find a lasting solution".

I'm done wasting my time.

Please send a full refund immediately.

Or:

I'm filing a complaint with the Better Business Bureau I'm filing a complaint with the attorney general's office I'm filing a case in small claims court

Thanks

I understand this situation can be frustrating, and we really want to work with you to find a solution. There could be various reasons for the issue you're experiencing, and it's possible it might be related to your electricity. Let's collaborate to investigate all potential causes. We're committed to resolving this together, although issuing a refund isn't something we can offer at this time. Your patience and cooperation mean a lot to us, and we're here to support you every step of the way.

All the best,

Barry
